Service Manual

RDS-EON/FM-MPX/MW/LW
Radio CD combination with
CD/MD changer control

Model **DRX6575Rz**
 (PE-2191E-B)

■ SPECIFICATIONS

Radio section

Tuning system: PLL synthesizer tuner

Receiving frequencies:

FM: 87.5MHz to 108MHz
(0.05MHz steps)MW: 531kHz to 1629kHz
(9kHz steps)LW: 153kHz to 279kHz
(3kHz steps)

CD Player section

System: Compact disc digital audio system

Frequency response:

5Hz to 20kHz(±1dB)

Signal to noise ratio:

100dB(1kHz) IHF-A

Dynamic range: 95dB(1kHz)

Distortion: 0.01%

Wow & flutter: Below measurement limits.

General

Max. power output: 4 × 40W

Power supply voltage:

14.4V DC(10.8 to 15.6V allowable),
negative ground

Power consumption: Less than 15A

Speaker impedance: 4Ω (4Ω to 8Ω allowable)

Auto antenna rated current:

500mA or less

Weight:

Main unit 1.7kg
Remote control unit
30g (including battery)

Dimensions(mm):

Main unit
178(W) × 50(H) × 155(D)
Remote control unit
44(W) × 110(H) × 27(D)

※ Specifications and design are subject to change
 without notice for further improvement.

■ NOTE

※ We cannot supply PWB with component parts in
 principle. When a circuit on PWB has failure, please
 repair it by component parts base. Parts which are
 not mentioned in service manual are not supplied.

■ COMPONENTS

PE-2191E-B

Main unit	_____	1
Remote controller	RCB-130-700	1
Battery(SUM-3)	_____	2
Mounting bracket	300-7745-00	1
DCP case	335-6035-02	1
Escutcheon(OUT-ES)	370-5774-00	1
Extension lead	854-6316-80	1
Parts bag	_____	
Removal tool	331-2548-00	2
Cord clamp	335-0833-01	1
Screw	716-0496-01	1
Rubber cap	345-3653-01	1
A-lead(for cellular phone)	850-6681-00	1

■ FEATURES

1. Rotary Encoder Control with Illuminated Search Key
2. Fully Detachable Flip Down Control Panel
3. RDS-Pro Receiver with EON, PS, AF, TA, TP, PTY, REG and CT
4. CD-Deck with 1-Bit D/A Converter and 3-Times Oversampling
5. High Power 4 × 40 W Max./4 Gold Plated RCA Line Level Output
6. Controller for MD and CD Changer

■ To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

1. Use specified parts.

The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.

The use of unspecified parts shall be regarded as remodeling for which we shall not be liable. The onus of product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified part being used.

2. Place the parts and wiring back in their original positions after replacement or re-wiring.

For proper circuit construction, use of insulation tubes, bonding, gaps to PWB, etc., is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.

If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.

3. Check for safety after repair.

Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.

If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

4. Caution in removal and making wiring connection to the parts for the automobile.

Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur. If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.

5. Cautions regarding chips.

Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc). The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.

6. Cautions in handling flexible PWB

Before working with a soldering iron, make sure that the iron tip temperature is around 270°C. Take care not to apply the iron tip repeatedly (more than three times) to the same patterns. Also take care not to apply the tip with force.

7. Turn the unit OFF during disassembly and parts replacement. Recheck all work before you apply power to the unit.

8. Cautions in checking that the optical pickup lights up.

The laser is focused on the disc reflection surface through the lens of the optical pickup. When checking that the laser optical diode lights up, keep your eyes more than 30cms away from the lens. Prolonged viewing of the laser within 30cms may damage your eyesight.

9. Cautions in handling the optical pickup

The laser diode of the optical pickup can be damaged by electrostatic charge caused by your clothes and body. Make sure to avoid electrostatic charges on your clothes or body, or discharge static electricity before handling the optical pickup.

9-1. Laser diode

The laser diode terminals are shorted for transportation in order to prevent electrostatic damage. After replacement, open the shorted circuit. When removing the pickup from the mechanism, short the terminals by soldering them to prevent this damage.

9-2. Actuator

The actuator has a powerful magnetic circuit. If a magnetic material is put close to it, its characteristics will change. Ensure that no foreign substances enter through the ventilation slots in the cover.

9-3. Cleaning the lens

Dust on the optical lens affects performance. To clean the lens, apply a small amount of isopropyl alcohol to lens paper and wipe the lens gently.

■ CAUTIONS

This appliance contains a laser system and is classified as a "CLASS 1 LASER PRODUCT". To use this model properly, read this Owner's Manual carefully and keep this manual for your future reference. In case of any trouble with this player, please contact your nearest "AUTHORIZED service station". To prevent direct exposure to the laser beam, do not try to open the enclosure.

Bottom view of Main Unit

Top view of Main Unit

CAUTION	-INVISIBLE LASER RADIATION WHEN OPEN AND INTERLOCKS DEFEATED. AVOID EXPOSURE TO BEAM.
VORSICHT	UNSICHTBARE LASERSTRAHLUNG TRITTS AUS. WENN DECKEL GEÖFFNET UND WENN SICHERHEITSVERRIEGELUNG ÜBERBRÜCKT IST. NICHT DEM STRAHL AUSSETZEN!
VARNING	-OSYNLIG LASERSTRÅLNING NÄR DENNA DEL ÄR ÖPPNAD OCH SPÄRR ÄR URKOPPLAD. STRÅLEN ÄR FARLIG.
ADVARSEL	-USYNLIG LASERSTRÅLING VED ÅBNING, NÅR SIKKERHEDSAFBRYDERE ER UDE AF FUNKTION. UNDGA UDSETTELSE FOR STRÅLING.

■ NOTES OF ISO CONNECTOR

1. For VW and Audi vehicles, change the position of fuse installation as shown on the diagram. (Figure 1)

Figure 1

2. The lead include with the unit must be connected to the specified position of the vehicle's ISO connector in order to use the "triggered audio mute for cellular telephones" function. (Figure 2)

Figure 2

■ TROUBLESHOOTING

	Problem	Cause	Measure
General	Power dose not turn on. (No sound is produced.)	Fuse is blown.	Replace with a fuse of the same amperage. If the fuse blows again, consult your store of purchase.
		Incorrect wiring.	Consult your store of purchase.
	No sound output when operating the unit with amplifiers or power antenna attached.	Power antenna lead is shorted to ground or excessive current is required for remote-on the amplifiers or power antenna.	<ol style="list-style-type: none"> 1. Turn the unit off. 2. Remove all wires attached to the power antenna lead. Check each wire for a possible short to ground using an ohm meter. 3. Turn the unit back on. 4. Reconnect each amplifier remote wire to the power antenna lead one by one . If the amplifiers turn off before all wires are attached , use an external relay to provide remote-on voltage(excessive current required).
	Nothing happens when buttons are pressed. Display is not accurate.	The microprocessor has malfunctioned due to noise, etc.	<p>Turn off the power, then press OPEN button and remove the DCP. Press the reset button for about 2 seconds with a thin rod.</p> 
		DCP or main unit connectors are dirty.	Wipe the dirt off with a soft cloth moistened with cleaning alcohol.
CD	Compact disc cannot be loaded.	Another compact disc is already loaded.	Eject the compact disc before loading the new one.
	Sound skips or is noisy.	Compact disc is dirty.	Clean the compact disc with a soft cloth.
		Compact disc is heavily scratched or warped.	Replace with a compact disc with no scratches.
	Sound is bad directly after power is turned on.	Water droplets may form on the internal lens when the car is parked in a humid place.	Let dry for about 1 hour with the power on.

■ ERROR DISPLAYS

If an error occurs, one of the following displays is displayed.

Take the measures described below to eliminate the problem.

	Error Display	Cause	Measure
CD	ERROR 2	A CD is caught inside the CD deck and is not ejected.	This is a failure of CD deck's mechanism and consult your store of purchase.
	ERROR 3	A CD cannot be played due to scratches, etc.	Replace with a non-scratched, non-warped disc.
	ERROR 6	A CD is loaded upside-down inside the CD deck and does not play.	Eject the disc then reload it properly.
CD changer	ERROR 2	A CD inside the CD changer is not loaded.	This is a failure of CD changer's mechanism and consult your store of purchase.
	ERROR 3	A CD inside the CD changer cannot be played due to scratches, etc.	Replace with a non-scratched, non-warped disc.
	ERROR 6	A CD inside the CD changer cannot be played because it is loaded upside-down.	Eject the disc then reload it properly.
MD changer	ERROR H	Displayed when the temperature in the MD changer is too high and playback has been stopped automatically.	Lower the surrounding temperature and wait for a while to cool off MD changer.
	ERROR 2	An MD inside the MD changer is not loaded.	This is a failure of MD changer's mechanism and consult your store of purchase.
	ERROR 3	An MD inside the MD changer cannot be played due to scratches, etc.	Replace with a non-scratched, non-warped disc.
	ERROR 6	An MD inside the MD changer cannot be played because it is loaded upside-down.	Eject the disc then reload it properly.
		Displayed when a non-recorded MD is loaded in the MD changer.	Load a pre-recorded MD in the MD changer.

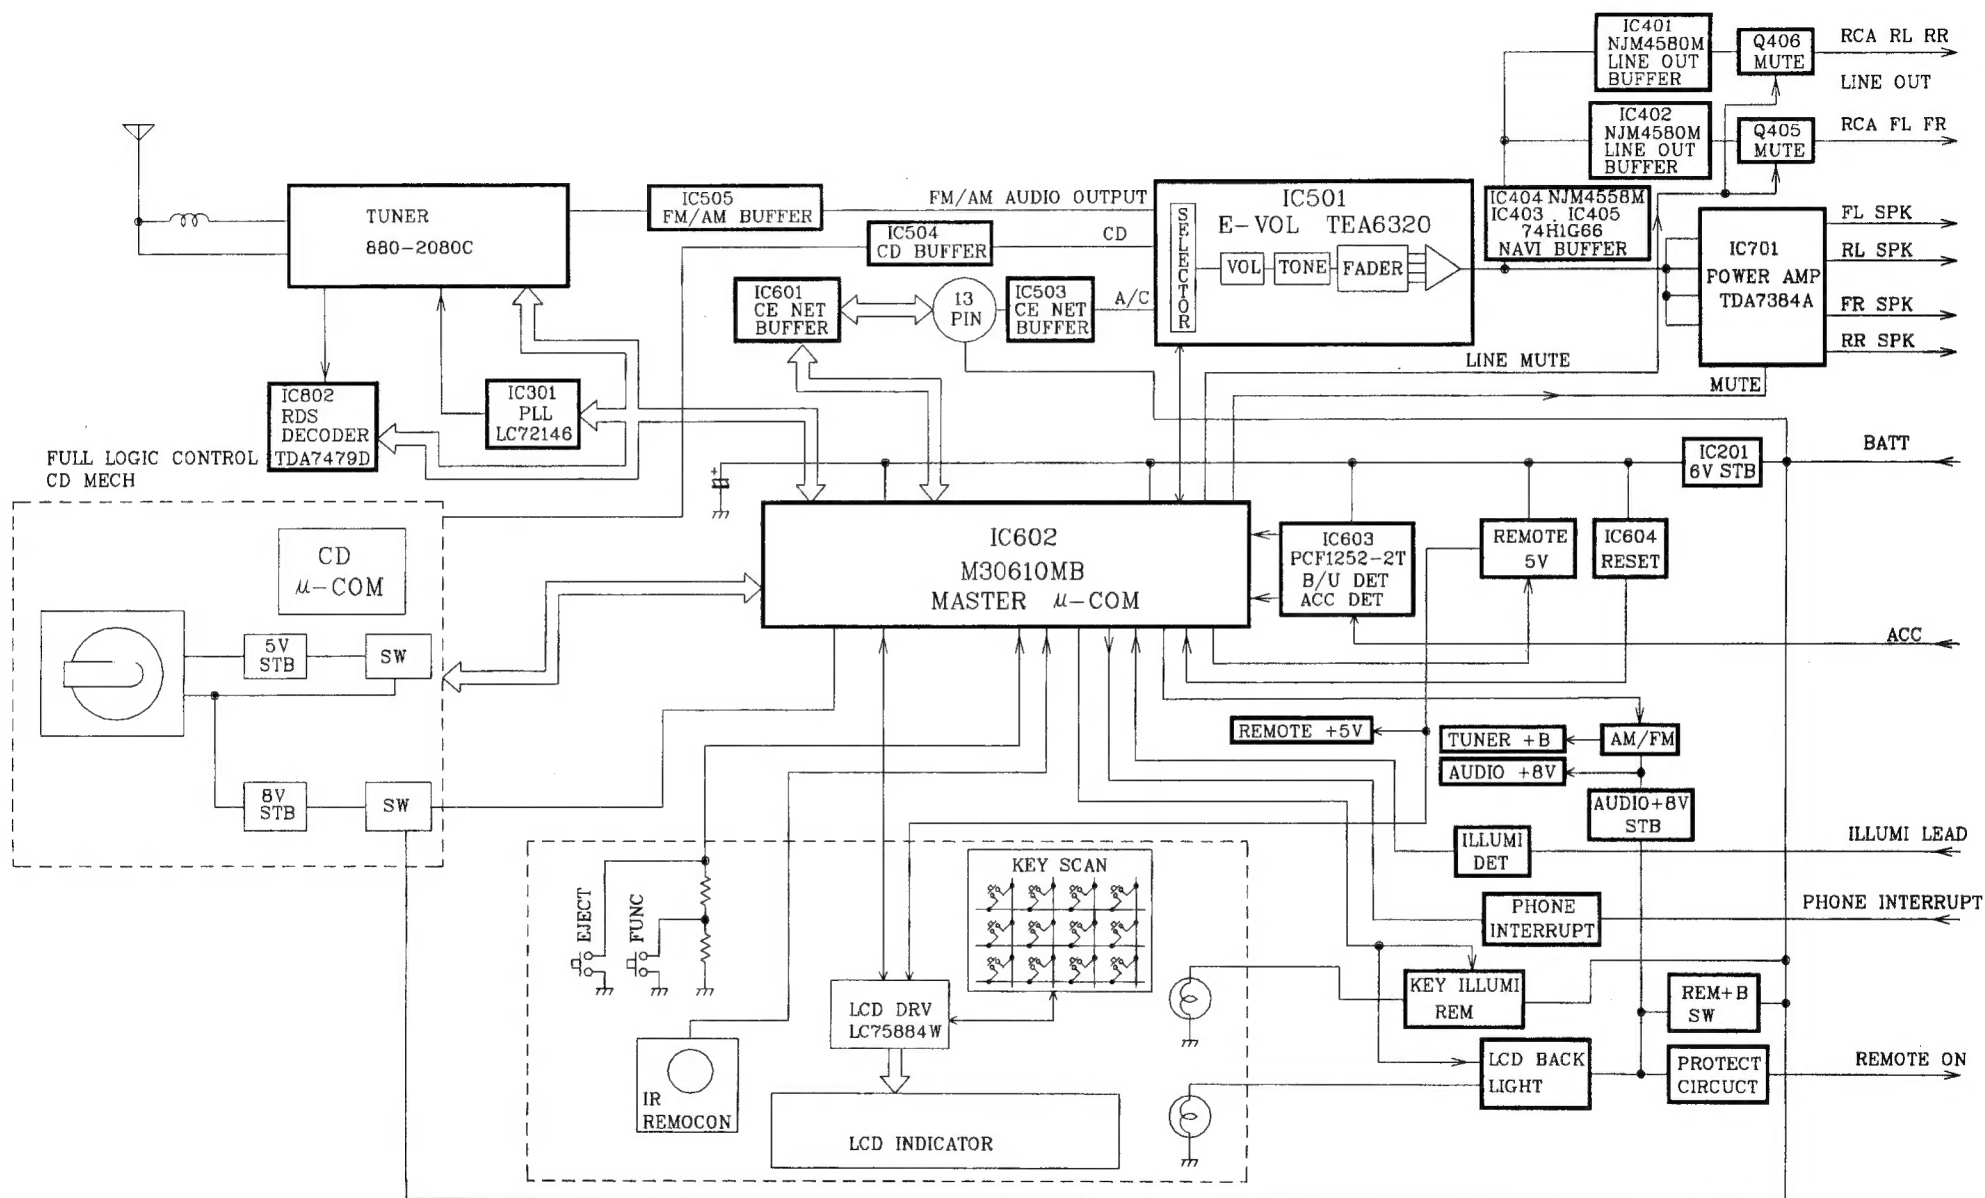

If an error display other than the ones described above appears, press the reset button. If the problem persists, turn off the power and consult your store of purchase.

■ ADJUSTMENT

Item	Procedure	Measuring instrument
S-meter	<ol style="list-style-type: none"> 1. Input the 98.1MHz/30dB μ (400Hz-MOD 30%) signal. 2. Turn on the power switch. And press the AF button and CH6 button at the same time. (TEST MODE) 3. Adjust the reading of LCD indicator to [30----00] ($3.0V \pm 0.2V$) by VR1. 	SG

Adjustment point

1. Outward Form : 100pins QFP

2. Function : Syna. separation, EFM, Error correction

3. Terminal Description

pin 1 : TESTO : IN : Not in use.
pin 2 : HSO : O : Playback mode flag output. Ref. Table 1.
pin 3 : UHSO : O : Playback mode flag output. Ref. Table 1.
pin 4 : EMPH : O : Emphasis flag output of Sub cord Q data. "H"= emphasis ON.
pin 5 : LR CK : O : Channel clock output. (44.1kHz)
pin 6 : VSS : — : Ground
pin 7 : B CK : O : Bit clock output. (1.4122MHz)
pin 8 : A OUT : O : Audio data output.
pin 9 : D OUT : O : Digital output.
pin 10 : MBOV : O : Buffer memory over signal output.
pin 11 : IPF : O : Compensation flag output.
pin 12 : SBOK : O : CRCC judgement output of Sub Q data. "H"=OK.
pin 13 : CLOCK : I/O : Clock output/input to read Sub cord P to W.
pin 14 : VDD : — : Positive supply voltage terminal.
pin 15 : VSS : — : Ground.
pin 16 : DATA : O : Sub cord P to W data output.
pin 17 : SF SY : O : Frame synchronize signal output.
pin 18 : SB SY : O : Sub cord block synchronize signal output.
pin 19 : SP CK : O : Clock signal output to read processor status. (176.4kHz)
pin 20 : SP DA : O : Processor status signal output.
pin 21 : COFS : O : Correction frame clock output. (7.35kHz)
pin 22 : MONIT : O : Not in use.
pin 23 : VDD : — : Positive supply voltage terminal.
pin 24 : TESIO0 : IN : Not in use.
pin 25 : P2Vref : — : (Reference voltage) × 2 terminal for PLL

pin 26 : HSSW : O : pin26=Vref : × 2-speed or × 4-speed.
pin 27 : Z DET : O : 0 flag output of 1 bit DAC.
pin 28 : PDO : O : Error signal output. (EFM-PLCK)
pin 29 : TMAX S : O : TMAX detect signal output.
pin 30 : TMAX : O : TMAX detect signal output.
pin 31 : LPF N : IN : Inverted input of amplifier for LPF.
pin 32 : LPF O : O : Output of amplifier for LPF.
pin 33 : PVref : — : Reference voltage terminal for PLL.
pin 34 : VCOref : — : Reference voltage terminal for VCO.
pin 35 : VCO F : O : Output of filter for VCO.
pin 36 : AVSS : — : Analog ground.
pin 37 : SLCO : O : Output of DAC for data slice level.
pin 38 : RF IN : IN : RF signal input.
pin 39 : AVDD : — : Positive voltage supply for analog.
pin 40 : RFCT : IN : Center level input of RFRP signal.
pin 41 : RFZI : IN : RFRP 0 cross.
pin 42 : RFRP : IN : RF ripple signal input.
pin 43 : FEI : IN : Focus error signal input.
pin 44 : SBAD : IN : Sub beam addition signal input.
pin 45 : TSIN : IN : Not in use.
pin 46 : TEI : IN : Tracking error input.
pin 47 : TEZI : IN : Tracking error, 0 cross input.
pin 48 : FO O : O : Focusing equalizer output.
pin 49 : TR O : O : Tracking equalizer output.
pin 50 : Vref : — : Reference voltage for analog.
pin 51 : RFGC : O : RF gain control signal output.
pin 52 : TEBC : O : Tracking balance control signal output.
pin 53 : FM O : O : Field equalizer output.
pin 54 : FVO : O : Field error or Field search EQ output.
pin 55 : DMO : O : Disc equalizer output.
pin 56 : 2Vref : — : 2 × Vref for analog.
pin 57 : SEL : O : Laser ON and UHS="H" : output "H"
pin 58 : FLG A : O : Monitor signal output.
pin 59 : FLG B : O : Monitor signal output.
pin 60 : FLG C : O : Monitor signal output.
pin 61 : FLG D : O : Monitor signal output.
pin 62 : VDD : — : Positive supply voltage.
pin 63 : VSS : — : Ground.
pin 64 : IO 0 : I/O : I/O port.
pin 65 : IO 1 : I/O : I/O port.
pin 66 : IO 2 : I/O : I/O port.
pin 67 : IO 3 : I/O : I/O port.
pin 68 : DMOUT : IN : Not in use.
pin 69 : CKSE : IN : Not in use.
pin 70 : DACK : IN : Not in use.
pin 71 : TESIN : IN : Not in use.
pin 72 : TESIO1 : IN : Not in use.
pin 73 : VSS : — : Ground.

pin 74 : PX I : IN : DSP oscillator input.
pin 75 : PX O : O : DSP oscillator output.
pin 76 : VDD : — : Positive supply voltage.
pin 77 : X VSS : — : Ground for system oscillator clock.
pin 78 : X I : IN : System clock oscillator input.
pin 79 : X O : O : System clock oscillator output.
pin 80 : X VDD : — : Positive supply voltage for system clock oscillator.
pin 81 : D VSR : — : Positive supply voltage for right channel DAC.
pin 82 : R O : O : Right channel data non-inverted output.
pin 83 : D VDD : — : Positive supply voltage for DAC.
pin 84 : D Vref : — : Reference voltage.
pin 85 : L O : O : Left channel data non-inverted output.
pin 86 : D VS L : — : Positive supply voltage for left channel DAC.
pin 87 : TEST 1 : IN : Not in use.
pin 88 : TEST 2 : IN : Not in use.
pin 89 : TEST 3 : IN : Not in use.
pin 90 : BUSO : I/O : Data bus to micro computer.
pin 91 : BUS 1 : I/O : Data bus to micro computer.
pin 92 : BUS 2 : I/O : Data bus to micro computer.
pin 93 : BUS 3 : I/O : Data bus to micro computer.
pin 94 : VDD : — : Positive supply voltage.
pin 95 : VSS : — : Ground.
pin 96 : BUS CK : IN : Clock input for data bus.
pin 97 : CCE : IN : Chip enable signal input. Negative logic.
pin 98 : TEST 4 : IN : Not in use.
pin 99 : TS MOD : IN : Not in use.
pin 100 : RST : IN : Reset signal input. Negative logic.

Table 1. Playback speed flag.

Play back speed	UHSO(pin3)	HSO(pin2)
Normal speed × 1	H	H
Normal speed × 2	H	L
Normal speed × 4	L	H
— — — — —	L	L

1.Outward Form : 20 pins SOP win fins

2.Function : BTL Driver × 4

3.Terminal Description

- pin 1 : S VCC : Positive supply voltage for the small signal stages.
pin 2 : IN 1 : Input terminal of amplifier1.
pin 3 : P VCC1 : Positive supply voltage for the power stage of amplifier 1.
pin 4 : OUT 1 + : Non-inverted output terminal of amplifier 1.
pin 5 : OUT 1 - : Inverted output terminal of amplifier 1.
pin 6 : OUT 2 - : Inverted output terminal of amplifier 2.
pin 7 : OUT 2 + : Non-inverted output terminal of amplifier 2.
pin 8 : P VCC 2 : Positive supply voltage for the plwer stage of amplifier 2.
pin 9 : IN 2 : Input terminal of amplifier 2.
pin 10 : Vref : Reference voltage input.
pin 11 : VCI : Decide the standard voltage of output.
pin 12 : IN 3 : Input terminal of amplifier 3.
pin 13 : P VCC 3 : Positive supply voltage for the power stage of amplifier 3.
pin 14 : OUT 3 + : Non-inverted output terminal of amplifier 3.
pin 15 : OUT 3 - : Inverted output terminal of amplifier 3.
pin 16 : OUT 4 - : Inverted output terminal of amplifier 4.
pin 17 : OUT 4 + : Non-inverted output terminal of amplifier 4.
pin 18 : P VCC 4 : Positive supply voltage for the power stage of amplifier 4.
pin 19 : IN 4 : Input terminal of amplifier 4.
pin 20 : S GND : Ground of the all small signal stages.
■ The fins are ground of all power stages.

1.Outward Form : S pine SIP

2.Function : Forward Rotation,Reverse Rotation,Brake,Free

3.Terminal Description

- pin 1 : OUT 2 : Motor drive output 2. Ref. Table 1.
pin 2 : RNF : Output stage ground,Resistor connection terminal to detect the output current.
pin 3 : OUT 1 : Motor drive output 1, Ref.Table 1.
pin 4 : VM : Positive supply volgate for the motor drivers.
pin 5 : GND : Ground.
pin 6 : VCC : Positive supply voltage.
pin 7 : FIN : Logic input. Ref.Table 1.
pin 8 : GND : Ground
pin 9 : RIN : Logic input. Ref. Table 1.

Table 1. Drive mode table.

Mode name	FIN (pin7)	RIN (pin8)	OUT 1 (pin3)	OUT 2 (pin1)
Forward Rotation	H	L	H	L
Reverse Rotation	L	H	L	H
Brake	H	H	L	L
Free	L	L	open	open
